## ADVANCED MICROFIBER SYSTEM (AMS)

Pro-Link's AMS is built around our Mega-Loop™ technology. Mega-Loop™ mops are the most advanced microfiber mops available. With extended loops, the mop has more surface area and more fibers - picking up more than 10 times the soil of traditional mops and 4 – 6 times more than standard microfiber mops. Pro-Link's AMS utilizes innovative handles, holders, buckets and wringers to complement Mega-Loop™ mops. These products are designed to reduce the risk of cross-contamination, keep your staff productive, reduce worker fatigue and strain, and minimize liability.

### A. MEGA-LOOP™ Microfiber Flat Mops

Extended loop technology picks up dirt and grime throughout the entire mop, not just at the leading edge like traditional microfiber mops. Eliminates the need to dry mop prior to wet mopping. Has no foam filler. 500 washings per mop. Other sizes and colors available.
