Description of necessary first-aid measures

Eye Contact Severe eye irritant. Liquid and mist may damage eyes, causing corneal damage. Flush with large quantities of water, holding eyelids open. Seek medical attention if irritation persists.

Skin Contact Severe skin irritant. May cause reddening, swelling and possible skin damage. Flush with water. Seek medical attention if irritation persists.

Inhalation Vapors and mist may be irritating to mucous membranes in the throat and lungs. Get to fresh air. Seek medical attention if irritation persists.

Ingestion	Irritating and corrosive to the mouth and throat. May cause headache, nausea, abdominal pain, vomiting and diarrhea. Do not induce vomiting. Drink large quantities of water. Seek medical attention immediately.
<u>Indication of immediate medical attention and special treatment needed, if necessary</u>	
Most Important Symptoms	May cause reddening, swelling and possible skin damage. Severe eye irritant. Liquid and mist may damage eyes, causing corneal damage. Vapors and mist may be irritating to mucous membranes in the throat and lungs. Irritating and corrosive to the mouth and throat. May cause headache, nausea, abdominal pain, vomiting and diarrhea.
General Information	Take off immediately all contaminated clothing. In the case of accident or if you feel unwell, seek medical advice immediately (show the label where possible.) Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Wash contaminated clothing before reuse.

5. FIRE-FIGHTING MEASURES

Suitable Extinguishing Media

Water fog. Carbon dioxide (CO₂).

Do NOT use water jet as an extinguisher, as this will spread the fire.

Specific Hazards Arising from the Chemical

No information available.

Special Protective Equipment and Precautions for Firefighters

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire-Fighting Equipment/Instructions

In case of fire and/or explosion, do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific Methods

Use standard firefighting procedures and consider the hazards of other involved materials.

General Fire Hazards

No information available.

6. ACCIDENTAL RELEASE MEASURES

Personal Precautions	Immediately evacuate personnel to safe areas. Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources. Wear appropriate protective equipment and clothing during clean-up. Fully encapsulating, vapor protective clothing should be worn for spills and leaks with no fire. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained.
Environmental Precautions	Avoid release to the environment. Contact local authorities in case of spillage to drain/aquatic environment. Prevent further leakage or spillage if safe to do so. Do not contaminate water. Avoid discharge into drains, water courses or onto ground.
Methods for Cleaning Up	Large spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Prevent product from entering drains. Following product recovery, flush area with water. Small spills: Wipe up with absorbent material. Clean surface thoroughly to remove residual contamination. Never return spills to original containers for re-use. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority to sewer systems without previously notifying the local sewage treatment plant authority.

7. HANDLING AND STORAGE

Precautions for safe handling

Keep out of reach of children. For use by trained personnel only. Keep container closed during storage. For institutional and industrial use only.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Occupational Exposure Limits	No data available
Biological Limit Values	No biological exposure limits noted.
Appropriate Engineering Controls	Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels to an acceptable level. If exposure limits have not been established, maintain airborne levels to an acceptable level. Eye wash facilities and emergency shower must be available when handling this product.

Individual protection measures, such as personal protective equipment

Eye & Face Protection	Wear eye/face protection. Wear safety glasses with side shields (or goggles) and a face shield. Wear a full-face respirator, if needed.
Hand & Skin Protection	Wear appropriate chemical resistant gloves and clothing.
Respiratory Protection	In cause of insufficient ventilation, wear suitable respiratory equipment. If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.
Hygiene Measures	When using, do not eat, drink or smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.
